FYE Research & Engagement
Project Proposal

Project Title

Skill Development & Career Readiness for FYE Student Employees

Student Name:

Supervisor:

Project Duration: Aug 24, 2026 to Dec 11, 2026

---

1. Project Purpose and Objectives

Purpose:

Objectives: By the end of this project, the student will be able to:

-

---

2. Project Scope

In Scope:

-

Out of Scope:

-

---

3. Methodology Overview

Tools may include (but are not limited to):

-

---

4. Timeline and Benchmarks

Phase	Timeframe	Key Benchmarks
Project Planning & Problem Definition	Weeks 1–2	Approved problem statement and project plan
Data Acquisition & Exploration	Weeks 3–4	Cleaned dataset and EDA summary

Data Preparation & Feature Engineering	Weeks 5–6	Final modeling dataset
Modeling & Analysis	Weeks 7–10	Baseline and refined models completed
Evaluation & Interpretation	Weeks 11–12	Model evaluation results and insights
Reporting & Visualization	Weeks 13–14	Draft report and visual assets
Final Delivery & Presentation	Weeks 15–16	Final report, presentation, and code submission

---

5. Deliverables

Required Deliverables:

1. Project Proposal (this document)
2. Cleaned and Documented Dataset(s)
3. Analysis Codebase
    - Well-documented scripts or notebooks
    - Reproducible workflow
4. Analytical Models
    - Description of methods used
    - Performance metrics and validation results
5. Final Written Report (15–25 pages, or per program guidelines)
    - Executive summary
    - Methodology
    - Findings and insights
    - Limitations and future work
6. Final Presentation
    - 10–15 slide professional presentation summarizing the project

Optional Deliverables (if applicable):

- Interactive dashboard
- Technical appendix
- Stakeholder-facing recommendations brief

---

6. Success Criteria

The project will be considered successful if:

- The analytical approach is appropriate and methodologically sound
- Results are clearly explained and supported by evidence
- Deliverables meet academic and professional standards
- The student demonstrates independent problem-solving and critical thinking

---

7. Risks and Mitigation Strategies

Risk	Mitigation
Data quality issues	Early data profiling and contingency datasets
Scope creep	Advisor check-ins and milestone approvals
Time constraints	Clear benchmarks and prioritized tasks

---

8. Approval
